PONTOON & DECK BOATS

HAVING A GREAT DAY DEPENDS ON WHAT GETS YOU THERE.

ON THE WATER

Beyond features, size and amenities, anyone who is considering a pontoon or deck boat is looking for one thing above all else - an escape from the regular world. A chance to run away from responsibilities and discover the relaxation and fun of the water. At Princecraft, we know the quality built into every pontoon and deck boat mirrors the quality of your family's experience. That's why we assert "the more you know, the better Princecraft looks." And that statement refers to more than durable construction and unmatched fit and finish. It means more than enduring comfort and boats engineered for optimum performance. It's our promise that a Princecraft pontoon or deck boat will offer you everything your family needs and wants for a truly great escape.

QUALITY.

**PRINCECRAFT
PONTOON & DECK BOAT
ADVANTAGES**

Quiet V-Shaped Motor Pod

The engineered V-Shaped hydrodynamic support is very quiet because its shape allows it to break water and prevents waves from pounding directly on it. Made from 100% 5052-H36 marine grade aluminum, each motor pod is strong enough to support the heavier four-stroke engine and gives you the power you need to participate in your favorite activities on the water.

BUILT STRONGER

STRENGTH. PERFORMANCE.

Perfect Round Tubes Created for the Toughest Safety Requirements

Princecraft only uses perfect round tubes made with H36, the most resistant marine aluminum alloy on the market. Each log is composed of airtight multi-chambers constructed and air-pressure tested to assure your maximum safety on the water with your family and friends. The construction of our logs makes our pontoon boats unsinkable.

Extruded M-Brackets and Z-Bars for maximum strength

Well known for its impressive solidity and integrity, Princecraft uses only extruded aluminum alloy in M-bracket and Z-bar construction. Each M-bracket has 4 contact points on tubes, top and sides, for optimal solidity. The Z-bars are placed on the pontoon in such a way as to give maximum rigidity at the back, where the motor rests, and where rigidity is absolutely necessary when full motor torque is needed at the start. As you can see, Princecraft's 54 years of experience in the marine industry are reflected in its engineering.

Splash-Free Dolphin Nose for a Drier Ride!

We have conducted several tests before creating our uniquely elegant, CAD designed dolphin nose with integrated splash guards (Versailles series only). Every Princecraft dolphin nose has an extra strong keel at the front that will break waves in a smoother way. Enjoy your "dry ride!"

Get Extra Protection with our Full Length Keel

In order to protect your pontoon's tubes, Princecraft has included a full-sized keel that will allow it to absorb any blows whenever you are coming alongside a beach or shore and to guide you well along the water. Further, the keel is made of ultra-resistant extruded aluminum that guarantees the protection of the integrity of your tubes.

Limited lifetime warranty on all pontoon wood decks

All our decks are made with 3/4" pressure-treated plywood and protected with our limited lifetime warranty. Your pontoon will keep its level flooring for years to come.

UNMATCHED Comfort and Convenience

Princecraft is recognized, without contradiction, as the leader with regard to comfort and the management of space within its pontoon and deck boats. From conception, the priority of our engineers is to design a well-thought out space to offer conviviality to all members of the family. Compare the leg space, the seating and storage capacity of our benches with any other company and you will see the difference. Choose the Princecraft comfort and you will also be choosing :

- Ultra-plush furniture
- Superior seating for ultimate comfort on the water all day long
- Maximum room for occupancy
- Ergonomic dash panel with every function close at hand
- Easily-washable marine-grade carpet
- Large storage compartments
- Smooth fences and finger-pinch guard hinges on gates
- Graphics and appearance
- Unequaled fit and finish

TO STAND UP TO THE WAVES

Princecraft deck boats reflect an unmatched concern with details by integrating the best aluminum alloys for marine use on the market such as the 5052-H36 which is 25% more resistant than certain alloys used by our competition. Princecraft deck boats are manufactured in three steps, combining welding, riveting and aeronautic adhesives.

The Advantages of Aluminum Deck Boats

- Last longer with a higher resale value
- Provide better performance with a smaller engine
- Plane faster and stay on plane at slower speeds
- Provide better fuel efficiency and easier towing
- Require less maintenance than fiberglass
- Can be beached on a rocky shore without chipping or cracking the hull
- More durable, which is why airplanes and tractor-trailer trucks are made of aluminum

DECK BOAT SERIES

VACANZA SERIES
Designed,
for smile after smile.

Just stepping onto a Vacanza Series boat is an experience that invites you to become immersed in the allures of the water. Loaded with luxurious extras, you'll never want to go back to the dock.

VENTURA SERIES
Built for a
complete day of fun.

The very unique versatile Ventura Series is perfect for those whose personalities are split between fishing and water sports. In a Ventura Series boat, both sides of you can be equally content.
