# PRINCECRAFT®

Princecraft® watercrafts are specifically created for adventurous souls lured by the promise of an exciting new experience on the water. Every day, our teams come together to design and build strong, durable boats that reflect our uncompromising, unparalleled pursuit of excellence. Because your passion for boating deserves nothing but the best.

**PRINCECRAFT®**  
**BRINGS THE**  
**SPIRIT OF**  
**BOATING**  
**TO LIFE.**

To explore the beauty of the great outdoors. To create lasting memories. To find your peace. Or get lost in the moment. Whatever your reason for choosing Princecraft®, we're shaping the future of boating so you can wholeheartedly dive into every single experience.

# HISTORY

Established in Princeville, Quebec (Canada), for over 70 years, Princecraft® is pushing the boundaries of innovation.

Between 1968 and 1973, the company is acquired and operated by the Brilliant family, originally from the Lower Saint-Lawrence region, and then by an American company, Lionel Industries, which renamed it Canadian Boat Manufacturing.

## 1950

In 1954, Princeville native Lionel Baril recognized the superior qualities of aluminum for boat building. With his brothers, Roger and Sarto, he founded Aluminum Boats and Canoes. The company quickly gained popularity across Canada, offering boats made of aluminum, wood, and fiberglass.

## 1960

In 1973, Alcan established Alcan Marine Products to expand into the aluminum boat market. The acquisition of Canadian Boat Manufacturing (among others) was a key part of this strategy and provided a strong foundation for local economic development.

## 1970

In 1985, Alcan withdrew from transformed aluminum products to concentrate on primary materials, but expertise in the design and manufacture of aluminum boats remained in Princeville thanks to the buyout of Marcel J. Dubois and Jacques Daneault. The introduction of Princecraft® pontoon boats that year marked a significant expansion of the company's product line, firmly establishing Princeville's reputation as Canada's boating capital.

## 1980

To know more about Princecraft's history, scan the QR code or visit [princecraft.com/history](http://princecraft.com/history).

**PRINCECRAFT®**

**From 1989 to 2000,** Princecraft® adapted to meet changing market demands. In 1992, in an effort to respond to competition in the fiberglass boat market, Princecraft® introduced the deck boat: the perfect hybrid between pontoon and boat.

**2000**

**PRINCECRAFT®**

**2010**

**PRINCECRAFT®**

**2020**

**1990**

**In 2001,** Brunswick Corporation, a major player in the leisure industry, acquired the Princecraft brand and its Princeville facilities. The company was officially renamed Princecraft Boats and continued innovating to incorporate technological advancements and meet consumer needs. The company's ongoing success can be attributed to its unwavering commitment to comfort, durability, impeccable aesthetics, and high-quality manufacturing across all its product lines.

**Over the past decade,** the company has focused on enhancing the performance of its pontoons, growing its dealer network, and expanding its manufacturing facilities to optimize operations and production. This commitment to excellence, coupled with its strong heritage, ensure that Princecraft® remains a trusted choice for families like yours that seek unforgettable boating experiences.

**OVER 70 YEARS OF BOATBUILDING  
EXPERIENCE HAVE TAUGHT US A THING  
OR TWO ABOUT WHAT SETS A GREAT BOAT  
APART FROM A GOOD ONE.**

# H36

To craft hulls that stand the test of time, we've combined our unparalleled expertise with the industry's finest aluminum alloy: 5052-H36. In fact, Princecraft® is one of the few manufacturers to utilize this cutting-edge material.

H36 aluminum stands out for its higher ultimate strength. Capable of withstanding extreme pressure, it provides greater peace of mind for boaters, significantly reducing the risk of cracking and leaks. Additionally, its exceptional yield strength makes it more flexible than other less-resistant alloys, so it recovers its shape better, essentially preserving the value of your boat for years to come.

Requiring more technical expertise, the long-term reliability of H36 boats is hardly matched. At Princecraft®, it's always about quality over quantity, so combining our experience with the choice of the finest materials like H36, is the cornerstone of this philosophy.

## THE ADVANTAGES

### SUPERIOR STRENGTH

H36 aluminum is exceptionally impact-resistant, offering a sturdy structure capable of withstanding the toughest conditions. It is 25% stronger than the aluminum used by most competitors.

### DURABILITY

H36 aluminum is incredibly durable. In fact, a lot of our boats are still cruising more than 25 years after they were manufactured.

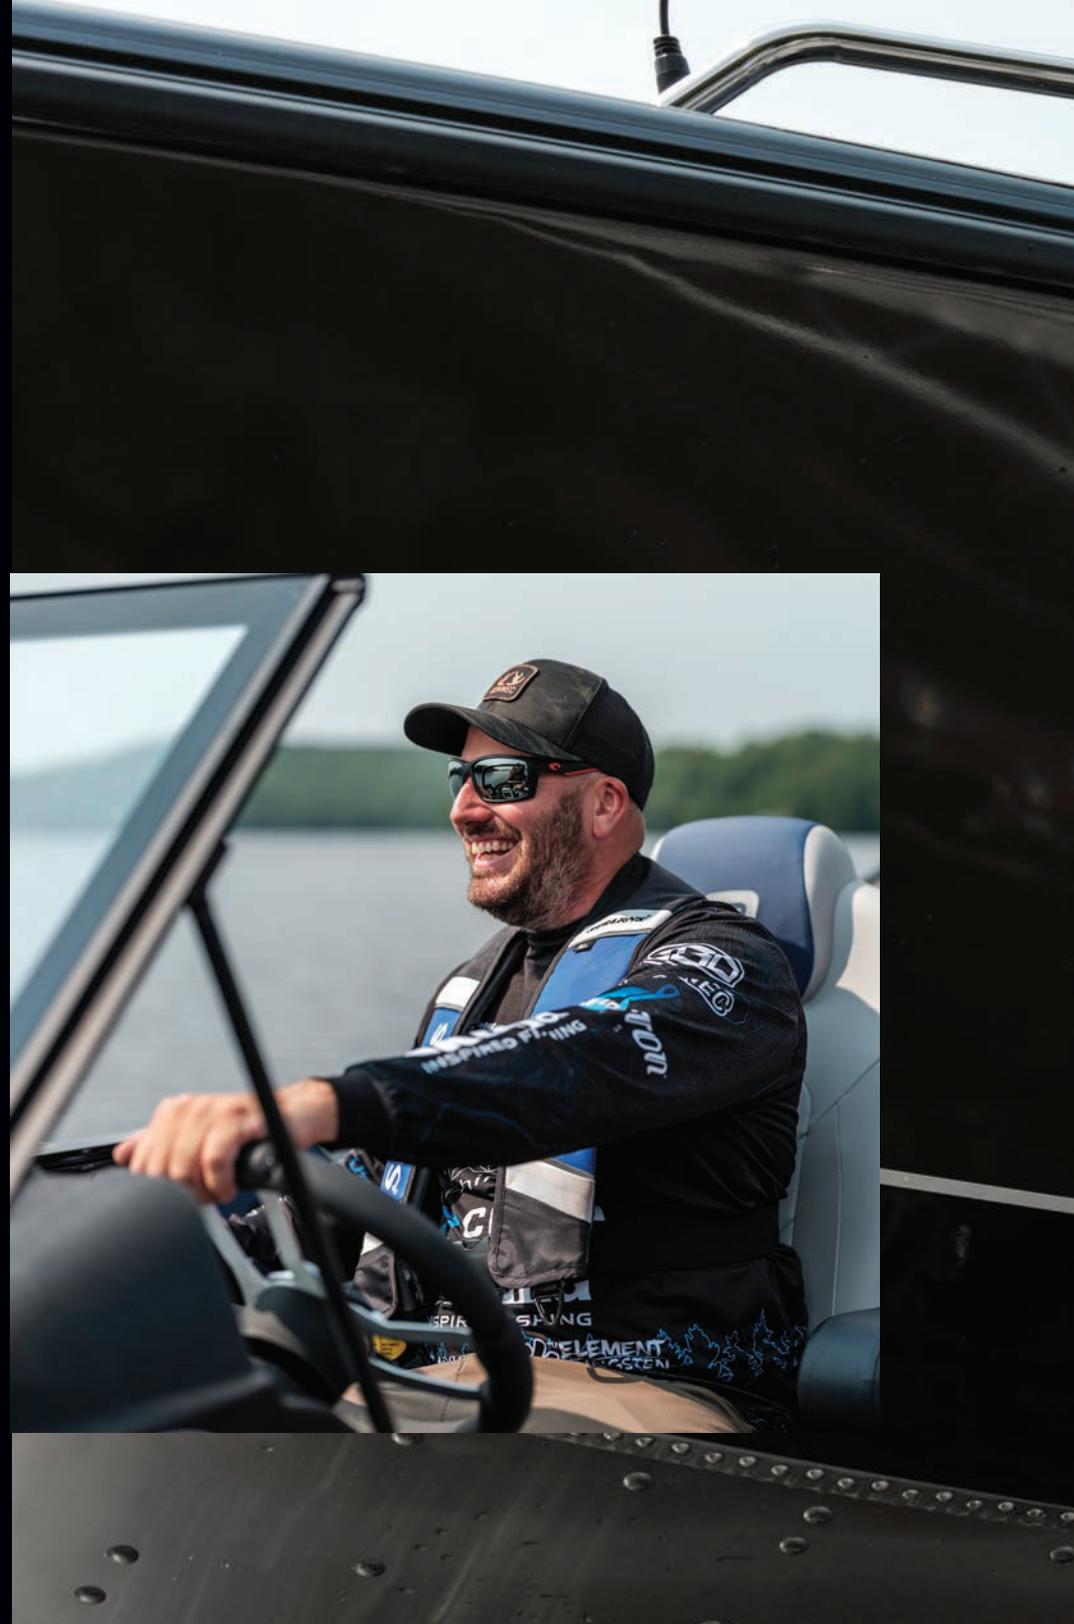

### ULTIMATE STRENGTH

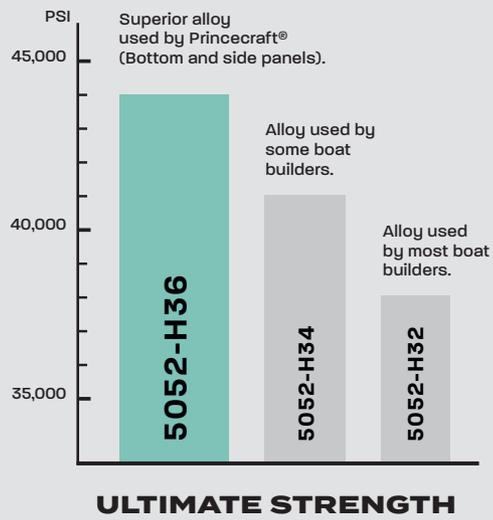

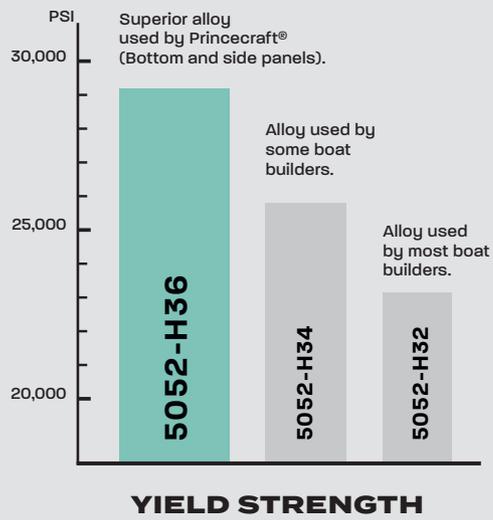

With a greater ability to resist impact before cracking or splitting, H36 aluminum can withstand pressures of up to 44,000 lb/sq. in. That means you can pull up on beaches and rocky bottoms without fear of damaging your boat.<sup>1</sup>

### HIGH YIELD STRENGTH

H36 aluminum's high yield point enables it to spring back to its original shape without sustaining permanent damage. This added flexibility reduces the risk of dents and dings from rocks and other hazards.

<sup>1</sup>Launching in very remote, shallow or uneven areas could result in damage to your boat and/or trailer and any resulting damage may be excluded from your warranty. Please check your warranty or with Princecraft customer service for further details.

\* Study conducted by Alcoa Innovation in 2011.

# PONTOON BOATS

*THE SPIRIT OF*  
**BOATING™**

# BETTER BUILT

For 40 years, Princecraft® pontoon boats have been a benchmark of excellence in their category. Crafted with durable H36 aluminum, corrosion-resistant hardware, and premium marine-grade equipment, our pontoons are built to last and will maintain their resale value for a long time.

Our pontoons feature ergonomically designed helm stations and interiors for intuitive, effortless control – whether you're a seasoned captain or a novice boater. They also offer plush, extra-wide seating with premium upholstery for a boating experience that is truly comfortable and beyond compare.

## H36

*Our pontoon frames are constructed with 1/4-inch-thick H36 aluminum Z-bars and heavier gauge tubes, all robotically welded for unsurpassed precision and unparalleled strength.*

We've added a full-length V-shaped keel beneath each pontoon log to deflect waves, help the pontoon maintain a stable course, and, most importantly, protect the tubes from any damage.

**VECTRA® 23 WRL –  
PERFORMANCE CONFIGURATION**

## SPORTFISHER 23-2S RL

Princecraft® pontoons are crafted with a meticulous attention to detail and feature concealed wiring, pressure-treated plywood flooring, and premium materials that reflect our commitment to excellence.

Explore our fishing pontoon models to discover a wide range of features specifically designed for anglers, including fishing seats, trolling motors, battery storage, livewells, and dedicated rod holders.

Our pontoons are also equipped with hydrodynamic V-shaped motor pods that can accommodate a variety of lightweight, high-performance motors.

Visit our website for more details on each model.

## CLASSIC CONFIGURATION ★★

The Classic configuration features twin logs, offering exceptional stability, maneuverability, and comfort. It's ideal for casual outings or spontaneous fishing trips that don't require high speeds.

*The Classic configuration comes standard on all models except the Vogue® series and Vectra® 23 WRL.*

## SPORT CONFIGURATION ★★★★★

Positioned between our Speed and Performance configurations, the Sport configuration offers the perfect balance of speed and affordability. Features include reinforced tube noses, bow central half third log, lifting strakes, and aluminum under-deck spray shield for enhanced buoyancy.

*This option is available for all our 21 to 25-foot pontoon models (Vectra®, Sportfisher, Sportfisher LX, Quorum®, Vogue®), except for the Vogue® 27 XT, Vogue® 27 RL, Vogue® 25 XT, Vogue® 25 RL, Vectra® 19, Jazz series, and Brio® series.*

# OPTIONAL CONFIGURATIONS

## SPEED CONFIGURATION ★★★

The Speed configuration is engineered for thrill-seekers who demand performance. With reinforced tube noses, lifting strakes, and aluminum under-deck spray shield, this configuration provides a 25-30% increase in top speed, making it the perfect choice for those who want to push the limits of boating.

*Available for almost our entire range, except for the Vogue® series, Vectra® 23 WRL, Vectra® 19, Jazz series and Brio® series.*

# DECK BOATS

The image features a black boat on the left side, partially visible, floating on a body of water. The background consists of a dense green forest on a hillside under a blue sky with scattered white clouds. Two thick orange horizontal bars with rounded ends are positioned at the top and bottom of the image, framing the central text.

*THE SPIRIT OF*  
**BOATING**<sup>TM</sup>

# VENTURA

*230 WRL | 230 RL | 200 RL*

*224 | 194 | 192*

Halfway between a boat and a pontoon, the Ventura series is designed for boaters who want it all. These aluminum deck boats are 30% lighter than comparable fiberglass models, meaning you'll save more money on gas. Whether you're looking for a leisurely cruise or a thrilling ride, Ventura has you covered.

**VENTURA 230 WRL**

Combining the best of both worlds, this series seamlessly blends the indoor comfort of a pontoon boat with the best-loved features of a fishing boat to give you the perfect hybrid. It's the ideal choice for family fun on the water. Ventura is equipped with USB ports, a lounge area, a table, a multiposition rear seat module, and an optional wakeboarding tower for your comfort and convenience.

# FISHING BOATS

*THE SPIRIT OF*  
**BOATING™**

# BETTER BUILT

Princecraft®'s one-piece, seamless H36 aluminum hulls are specifically designed to provide exceptional stability, reduced vibration, and superior watertight integrity. Since most pounding from waves is absorbed at the bow of the boat, we rivet an additional layer of aluminum onto the hull fold and double the thickness of the boat bottom. Most models feature a reverse chine hull for excellent handling, while select models boast a double reverse chine hull for maximum performance and safety. At high speeds, the double reverse chine hull maintains water contact to prevent lateral rocking. It all adds up to a worry-free boating experience that lets you focus on what matters most: the thrill of the catch.

## H36

*Twin-plated hull at major stress points: full length in the center and where hull bottom meets sides and transom as well as on the joint between the sides and bottom.*

**PLATINUM 220**

To ensure the strength and durability of our boats, we choose riveting rather than welding. Riveted joints are highly reliable and easy to check, with minimal margin of error. This makes it easier to repair your boat, and the risk of breakage is almost nil. This technique, proven in the transport industry, also combines reliability and flawless finish. Rivets also stand up well to vibration, which is key when your boat is slicing through the waves or coming up onto the beach.

**HUDSON® 190 WS**

## **FEATURES**

We've gone the extra mile to ensure your Princecraft® fishing boat looks as good as it performs. Carefully concealed cables, durable high-gloss urethane paint, and select marine-grade trailer covers contribute to the boat's sleek appearance.

Snap fasteners added to tops and covers make adjustments a breeze. Our high-profile tops with transparent 'Mica' panels give you a commanding view in all directions – a valuable feature for weathering storms.

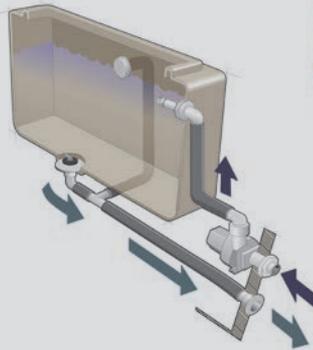

What's more, our boat floors are also assembled in sections for easy access when needed.

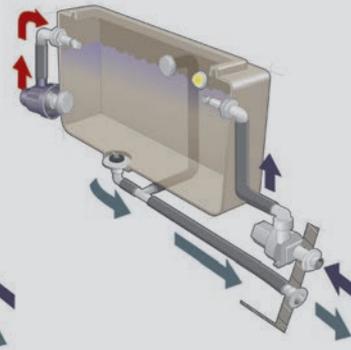

## LIVEWELLS

Princecraft® offers a variety of high-quality livewells to keep your catch fresh and lively.

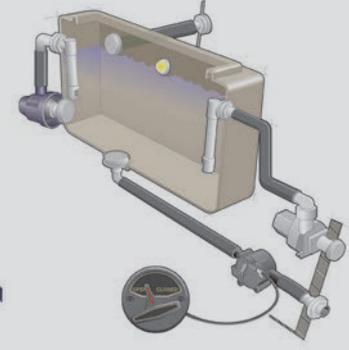

### SPORTFLO™

This livewell is designed with a high-performance, filtered pump for optimal water circulation and oxygenation, along with an overflow system and anti-spill cover.

### PROFLO™

The ProFlo™ livewell offers the same features as the SportFlo™ model, but also includes an extra water recirculation pump, a light, and an intermittent recirculation system that gives you control over the water oxygenation level. The system operates whether the boat is in motion or at rest.

### PROFLO™ PLUS

Appreciated for its low maintenance, this livewell features electric recirculation and fill functions, as well as a dual-pump system. Enjoy the peace of mind of knowing your bait and catch will stay fresh, whether you're cruising or anchored.

**TO FIND THE BEST  
SPOT, FOLLOW YOUR  
INTUITION TO THE MOST  
REMOTE LOCATIONS  
COME RAIN OR SHINE.**

## **A TOWING SYSTEM BUILT TO LAST**

All Princecraft® trailers feature an ingenious bearing system that combines the benefits of grease and oil for superior lubrication and exceptional performance. Its unique characteristic is that it becomes more fluid under heat, enhancing lubrication, reducing friction, and quickly regulating temperature. Equally impressive is the fact that each bearing is pressurized and then sealed to prevent contamination and leaks.

With the Vault™ system, there's less maintenance, which means you spend more time on the water and less time in the garage.

**PLATINUM 190**

# ***PLATINUM***

**220 | 200 | 190**

Experience the epitome of luxury and performance on the open water. With its double reverse chine hull and high freeboard, the Platinum series is designed to tackle any conditions with confidence.

HIGH PERFORMANCE

PURE SOPHISTICATION

Boasting ample space, two livewells, a lockable in-floor storage compartment, and a heated captain's chair (also available as an option for your passenger), the Platinum is a dream come true for big lake anglers. Ask to find out more about the high-tech equipment options offered in this series, such as an additional Simrad® multifunction touchscreen and a wide selection of sonars. Enough to quench your thirst for adventure.

# SPORT

188 | 185 | 175

Stability, power, and safety are the three pillars that make the Sport series so attractive. Designed to please both young and old, these dual-console boats are both agile and robust, and feature a higher than average freeboard for enhanced passenger safety. Standard equipment includes a livewell, a storage compartment for fishing rods, rear bench seating, and a spacious cockpit, making the Sport series the perfect choice for all your favourite on-water activities.

# ACCESSORIES

Make every moment on the water count with our complete range of optional accessories designed to simplify your days and help you push the limits of your passion for the water. Visit our website to browse the entire catalogue.

## **SOUND SYSTEMS**

High-end sound equipment for music lovers who want the perfect soundtrack for every adventure.

## **LED LIGHTING**

Whether it's for relaxation or passenger safety, the right lighting makes all the difference. Check out our selection of docking lights, mood lights, and other technology packages available as options on many of our boats.

## **CAMPER ENCLOSURES<sup>1</sup> AND BIMINI TOPS**

All our pontoons and deck boats come with Bimini tops, as well as optional camper enclosures. For the more adventurous, fishing boats can also be fitted with full enclosures. Ask for details.

<sup>1</sup> Full camper enclosures should only be used while the boat is at anchor or rest and never when engines are running. See owner's manual.

# TRAILERS

Discovering an amazing fishing spot is one thing. Getting there is another. Princecraft® trailers are galvanized to protect them from rust and are equipped with sealed Vault™ hubs to minimize maintenance, as well as radial tires tough enough for gravel roads. Most models also feature a swing tongue. All of which means you can get to those out-of-the-way lakes and rivers with the confidence that your trailer will follow you all the way there. Plastic fenders can be replaced by optional steel fenders on some models.

## BOAT AND DECK TRAILERS

Galvanized, reinforced trailers with swivel parking jack, swing tongue, optional hydraulic brakes, and sealed Vault™ wheel bearings.

## PONTOON TRAILERS

Heavy-duty galvanized bunk trailers with parking jack, front ladder and optional hydraulic brakes.

## ALL PRINCECRAFT® TRAILERS ARE EQUIPPED WITH THE VAULT™ SYSTEM.

Each bearing is housed in a pressurized, 100% leak-proof chamber. This ingenious system combines the advantages of grease and oil, to create a high-performance hybrid lubricant that reduces friction and dissipates the heat generated during towing.
